

CMA Announces Bolsa Mexicana de Valores (BMV) Market Data and Trading with Casa de Bolsa Finamex

March 4th – New York (USA), Mexico City (Mexico) - CMA the leading market data, order management and connectivity provider of Latin American exchange trading announces its deployment of CMA Series 4 - a market data and order management system deployed at Mexican Exchange Brokerage, Casa de Bolsa Finamex.

In a high frequency, low latency trading environment the professional investor requires the most efficient and still the fastest real time market data in order to discover and act on profitable opportunities. Precise execution begins with a reliable market data platform that enables trading at the user's desired intervals.

"Bolsa Mexicana de Valores regularly looks to provide high value through having its instruments, real time and historical market data displayed and presented in the best possible format traders and investors need," states Ms. Catalina Clave, Head of BMV Market Data. "For the last 3 years CMA has been an important BMV market data vendor for the exchange exceeding the standards our members and their clients expect when trading Mexican Securities," Ms. Clave adds.

Casa de Bolsa Finamex has deployed CMA Series 4 for market data and order management support for local and international trading. CMA Series 4 also allows Finamex to connect to other CMA Series 4 users in other markets and users connected to CMA's Global FIX network Trade Hub. Due to the OMS functionality of Series 4, Finamex can execute trades with the BMV and have the ability to send and receive orders through Trade Hub, a notable community of thousands of users.

"Year over year, we here at Finamex have continued to apply next generation trading technology to be at the fore-front of high frequency trading performance in the Mexican Financial Markets," said Hector Casavantes, Director of Electronic Trading Services at Finamex. "When it comes to Straight-Through-Processing (STP) of market data and order execution, CMA Series 4 has the advanced understanding of how to facilitate the trade process locally with an in-depth understanding of bringing international clients' orders to the Finamex platform," Mr. Casavantes concluded.
